

Low Freezer -20°C

Scope of Application :

Freezers provide effective storage of life-saving vaccines and samples for diagnosis. They can also be used for storage of enzymes for genetic research, as well as culture media, reagents and samples for testing. Freezers are also ideal for industrial aging and temperature tests. As a storage environment, with excellent safety and other easy-to-use features, these freezers offer unsurpassed reliability and functionality.

CONSTRUCTION :

MOC of the chamber will be Double walled chamber.

Interior Stainless Steel 304 Exterior made up of GI sheet duly pre painted.

PUF Insulation in between two walls.

Self-Closing Main double doors with magnetic gasket.

In addition to a standard-feature door lock, a hole in the latch allows a padlock to be attached.

TECHNICAL SPECIFICATIONS:

- Corrosion-free Exterior and interior.
- Temperature Accuracy : $\pm 1^{\circ}\text{C}$.
- Temperature Range: -16°C to -22°C
- Designed for long storage of products.
- Refrigerant: 404A HFC Free.
- Height Adjustable shelves.
- Environment-friendly CFC-free cooling.
- Microprocessor-based Digital display temperature controller.
- Audio-visual alarm for high and low temperatures.
- PUF insulation.
- Reliable Energy Efficient. Sturdy Construction.
- Low Maintenance.
- Thick insulation ensures temperature stability
- Access Port for Validation Purpose.
- Smooth Castor Wheels
- Power supply: 210-240V 50Hz
- ISO & CE Certified product.

Storage containers useful for organizing:

The standard storage containers are useful for dividing small items and allow for efficient sample storage.

Control Panel:

Control panel is easy to operate. All inputs including temperature and alarm settings can be selected on the panel.

Security Functions:

With a temperature control capability that inhibits the change in temperature inside the chamber, and an alarm/security function that prevents errors, the unit maintains the quality of the preserved samples.

Energy:

Compressors minimize energy consumption, reduce environmental impact and save money on running costs. Innovative inverter technology provides a reliable and exceptionally stable temperature for a wide range of storage applications. These Biomedical ECO freezers are a better selection when focusing on energy-efficiency and lower running costs.

Optional Accessories:

- ❖ Cryo Gloves
- ❖ Cryo Racks
- ❖ Cryo Boxes
- ❖ Datta Logger
- ❖ Chart Recorder

Freezer Model :

Model	Capacity	Dimension
RS-LF-300	300 Ltrs	614 x 709 x 1620mm (W x D x H)
RS-LF-400	400 Ltrs	616 x 770 x 1802mm (W x D x H)
RS-LF-500	500 Ltrs	793 x 770 x 1802mm (W x D x H)
